

What's New in Access

Query & Relationship designer improvements 2002

Scroll wheel of mouse in design or SQL view

Find and replace in SQL view of query editor

Multi select controls with box

Additional Right click on a table options (Remove Table & Properties were only options previously)

Auto-size tables

Add tables interface – notice Search and breakdown of types

What's New in Access

Ace Redistributable 2001

Issue – starting with Office 2016 thru Office 365, the ACE engine was not exposed outside of office. Other programs that tried to use this were unable to unless you installed a separate engine, cross bitness and different platform (ie 2010) were required.

ACE OLEDB provider now exposed – should enable Power BI, SSMS

Coming soon – DAO (SSMA) & ODBC

What's New in Access

Other recent changes

Hex in colors - custom (2004)

Tabs (1903)

Zoom - Shift + F2 – Font addition (1901)
